

ICS XPREZZ™

Continuity of Care — from Anywhere

Available on the  
**App Store**

**ECOMED**  
Serving The HealthCare Industry

# ICS XPREZZ™

ICS XPREZZ provides the support clinicians need to always be there for patient care.

With ICS XPREZZ Spacelabs Healthcare takes mobility of care to a higher level, providing the power of ICS G2 Clinical Access in the palm of your hand.

Now clinicians on the go can have access to comprehensive patient information, including near-live waveforms and graphical trends, on their iPads or other mobile devices.

**Decisions can be made more quickly than ever before with critical patient information in the palm of your hand.**

## Designed for Mobility

**ICS XPREZZ is the perfect fit.**

- Simple and cost effective: Connect Spacelabs monitors and view with ICS XPREZZ, using your network
- Designed for touch screen: Perfect for tablets
- Secure: No patient data processed or deposited into the iPad
- Consistent: Identical user interface regardless of location — tablet, PC or bedside monitor

Have all your patient information with you, all the time:

**Bedside View**  
How is your patient doing now?

**Waveform View**  
Smart disclosure.

**Arrhythmia View**  
Retrospective Holter analysis.

**Alarms View**  
Alarm event review.

**Saved Events View**  
Saved events, alarms, arrhythmias and strips.

**Trends View**  
Customized – sorted, grouped and prioritized the way you like it.

**12-Lead View**  
Compare 12 leads to evaluate treatment.

**Print Jobs View**  
Preview, print or reprint monitor recordings.
