

seca 374

Wireless baby scale with extra large weighing tray

EMR-integrated

- Network-capable with seca 360° wireless technology.
- Adjustable damping.
- High-quality seca scale technology with fine 5-gram graduation.
- TARE, HOLD, auto-HOLD and BMIF for extra convenience.
- Extra large and ergonomic tray for safe weighing.
- Optional measuring rod seca 233 expands scale into a measuring station.

seca 374:**Restless baby? Not a problem!**

Ergonomic, convenient and time-saving. Those are the keywords for seca 374. Its extra large tray lets you weigh a seated toddler of up to 20 kg. The adjustable damping function together with the HOLD key makes sure you get fast and accurate measurements. Even time-consuming handwritten recordkeeping is a thing of the past, thanks to the seca 360° wireless technology. Now – if you like – the scale can send results wirelessly to the seca 360° wireless printer or to the software seca analytics 105 on your PC.

The shell-shaped tray guarantees safety.

The seca 374 holds babies safely and comfortably in the shell-shaped weighing tray, whose ergonomic form was designed especially with the weighing of infants in mind. The slightly raised sides make the baby feel safe and secure and prevent the baby from slipping off the scale.

With the seca 360° wireless technology, just the press of a button sends measurement results from the seca 374 to an optional seca wireless printer or to the seca software on your PC.

The raised sides of the weighing tray guarantee that babies cannot slip off the scale.

TARE, HOLD and BMIF speed up the weighing process.

The seca 374 makes it easy for you to work fast: with prolonged pressing of the TARE key, you can calculate the baby's weight minus diaper or soft mat. With the BMIF (Breast-Milk-Intake Function) menu selection, you can see how much milk a breast-feeding baby has consumed. You want to take care of the baby and then read the results? No problem, thanks to auto-HOLD.

An optional measuring rod for simultaneous weighing and measuring.

Another time-saving benefit of the seca 374 comes from the optionally available measuring rod seca 233, which lets you weigh and measure in just one step. Of course with proven seca quality.

With the optional measuring rod seca 233, the seca 374 becomes a complete weighing and measuring station.

Paperless and error-free wireless transmission of measurements.

With the seca 360° wireless technology the seca 374 can transmit measurements to the optional seca 360° wireless printer. With the network-capable software seca analytics 105 and wireless USB adapter seca 456, your PC can receive and analyze measurements and forward them to an Electronic Medical Records (EMR) system. Thus the seca 374 is EMR-integrated and ready to handle digital patient records and all the demands the future will bring. More information about EMR integration is at www.seca.com.

seca 374**Technical Data**

- Capacity: 20 kg / 44 lbs
- Graduation: 5 g < 10 kg > 10 g / 0.2 oz < 22 lbs > 0.5 oz
- Dimensions (WxHxD): 620 x 190 x 358 mm / 24.4 x 7.5 x 14.1"
- Dimensions of weighing surface (WxHxD): 615 x 130 x 275 mm / 24.2 x 5.1 x 10.8"
- Weight: 3.6 kg / 7.9 lbs
- Power supply: Batteries / mains adapter (optional)
- Data transmission: wireless technology seca 360° wireless
- Functions: TARE, BMIF, HOLD, auto-HOLD, automatic switch-off, damping, kg/lbs switch-over
- Optional: head and foot positioners seca 418, measuring rod seca 233, mains adapter seca 447, switch-mode mains adapter seca 400
- System compatible with: 360° wireless printer advanced seca 466, 360° wireless printer seca 465, software seca analytics 105, 360° wireless USB adapter seca 456
