VITALOGRAPH myPEF

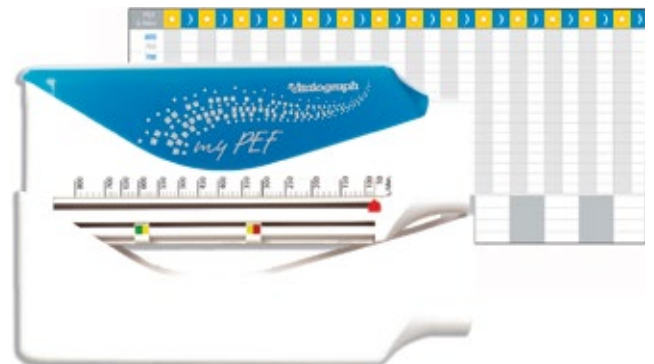

Peak Flow Meter

The effective management of asthma relies on early identification of the threat of potential exacerbations. The ability to respond promptly depends on close monitoring of peak flow to help protect quality of life and optimise the efficacy of medication.

Vitalograph® has been providing simple and effective peak flow meters for use in healthcare environments and the home for over 50 years. The Vitalograph myPEF™ Peak Flow Meter is easy to use and highly accurate. The attractive, ergonomic design and the simple colour coded scale help to support patient compliance and effective monitoring.

- Suitable for adults and children
- For use in clinics, general practice, sports medicine and at home
- Highly accurate
- Lightweight and portable
- Ergonomically designed with comfortable integral mouthpiece
