# Neonatal Intensive Care Products

CASMED® produces the world's finest quality neonatal products. By combining innovative research & design with superior materials and technologies our products consistently deliver unsurpassed reliability, efficiency and performance. This quality means better care for babies, as well as greater effectiveness for practitioners and real value for hospitals.

## Better quality for better care

You don't compromise on care, so why compromise on quality? CASMED offers a full range of top-quality NICU products.

## Products

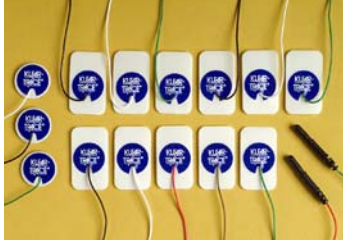

- Klear-Trace® Electrodes
- NeoGuard® Reflectors
- NeoGuard Temperature Probes
- NeoGuard Limboard® Arm Boards

Mother  baby

# Neonatal Intensive Care Products

## Klear-Trace® Electrodes

- Proprietary hydrogel adhesive provides excellent skin contact for a high-quality signal
- Easy application & removal without irritating babies' skin
- Radiolucency lets electrodes stay in place during x-ray
- Typically maintains adhesive quality for 3-7 days
- 100% tested
- Five styles available

## NeoGuard® Reflectors

- Holds NeoGuard Temp Probes securely to skin while shielding it from radiant heat
- Proprietary hydrogel adhesive allows probe to be removed and repositioned without irritating babies' skin
- Two sizes to fit any baby

## NeoGuard® Temperature Probes

- Single-patient-use probe designed for length of stay improves cost recovery
- Low-profile design and thin, pliable wire enhance flexibility and patient comfort
- Each probe is packaged with a NeoGuard Reflector
- Packaged 40/case
- Two types available

## NeoGuard® Limboard® Arm Boards

- Soft, foam construction for comfortable, effective IV stabilization
- Proprietary hydrogel strips hold Limboard in place without harming the skin
- Can be reshaped multiple times as IV sites are repositioned
- Packaged 48/case
- Two sizes to fit all infants
