

R-22MED Oxygen Sensor

Offering long life and fast response, the high quality R-22MED replacement sensor incorporates a molded body design. Specific for medical use, this sensor exceeds the demands of a modern operating theatre with added protection against long term effects of nitrous oxide.

Best of all, the R-22MED costs less than the sensors it replaces, creating additional savings while providing superior quality.

For further information on the R-22MED or any product in Teledyne's complete line of medical oxygen analyzers and sensors, contact the factory or your distributor.

Specifications

Output:	(7-13mv) in air at 25°C sea level
Range:	0-100% O2 (max), 0-1% O2 (min)
Accuracy:	Within ±1% of full scale at constant temperature and pressure
Response time:	Less than 6 seconds to 90% of final value
Operating humidity:	0-99% RH (non-condensing)
Operating temp:	0-40°C (32-104°F)
Storage temp:	0-40°C (32-104°F)
Expected cell life:	36 months in air at 25°C and 50% RH
P/N:	C44611-R22MED
